The XBase64Dll is a 32 bit Encoding Dll that will decode and encode you Base64 information. It can be imported into any Visual Studio project which can be found here ), the Court must now determine whether summary judgment is appropriate on any of the other three claims.[2] III. LEGAL ANALYSIS A. Title VII A district court may only grant summary judgment "if the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." Fed. R. Civ. P. 56(a). A "genuine" issue of material fact exists if the evidence, viewed in the light most favorable to the non-moving party, is such that a reasonable jury could return a verdict for the non-moving party. Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S.Ct. 2505, 2510, 91 L.Ed.2d 202 (1986). A "material" fact is one that "might affect the outcome of the suit under the governing law." Id. A "dispute about a material fact is 'genuine'... if the evidence is such that a reasonable jury could return a verdict for the nonmoving party." Id. Generally, as the Supreme Court has noted, "summary procedures should be used sparingly in complex cases, and then only after the district court engages in a complete analysis of the record to satisfy itself that no factual issue genuinely exists." Taxpayers for Vincent, 466 U.S. at 805-06, 104 S.Ct. 2118 (internal citations omitted). "The mere existence of some alleged factual dispute between the parties will not defeat an otherwise properly supported motion for summary judgment; the requirement is that there be no genuine issue of material fact." Anderson, 477 U.S. at 247-48, 106 S.Ct. 2505. An issue is not genuine if it is unsupported by evidence, or if it is created by evidence that is "merely colorable" or "fraudulent." Id. at 249-50, 106 S.Ct. 2505; see also L.P. Hughston Properties, Inc. v. Rimmel Corp., 713 F.Supp. 1511, 1515 (S.D.Fla.1989) ("[T]he nonmoving party

### What's New in the?

This package provides an easy way to base64 encode and decode strings. In most cases, you will be using XBase64.Net from NuGet ( This has better exception handling, but also makes you install multiple assemblies. An older version of XBase64 is included here for those who prefer the old way of doing things. A: If you are developing a console or web application, you can simply add System.Text.Encoding.Unicode, System.Text.Encoding.UTF8 and System.Text.Encoding.ASCII in your project. A: To get Base64 right as the other answers mentioned, you also have to specify that you want to use the UTF8 encoding (assuming you're on .Net 4 or higher). Encoding enc = Encoding.UTF8; string data = Encoding.Default.GetString(bytes); return data; The reason is that Base64 has an automatic encoding conversion, in which base 64 encoding of some data simply builds up the base 64 encoding of the other encoding. So if you use Encoding.Default, you'd be forced to use another encoding which might cause complications to the base 64 encoding process. But as I said, this is just my opinion, if you use the Base64 class that other answers suggest, you're all set. 1. Field of the Invention The present invention relates to a proppant injection apparatus, and more particularly, to a proppant injection apparatus for a fracturing operation. 2. Description of the Prior Art Prior art fracturing treatment systems, such as the Hydro-Plan® Hydraulic Fracturing System manufactured by Baker Hughes Incorporated of Houston, Tex., comprise various components and various features. In the operation of these systems, a high-pressure liquid is forced into the wellbore so as to create fractures in the subterranean formation and to thereby cause one or more sand proppants to be released into the resulting fractures. As the sand proppants are projected into the fractures, the proppants tend to form a network or "pack" which serves to prop the fracture open. Fracturing operations may be enhanced by the use of "proppant packers" which may prevent some of the sand from escaping the fracture, thereby also greatly reducing the loss of sand from the fracture. The fracturing

**System Requirements For XBase64:**

The minimum specifications for running this mod are not actually designed to require much system horsepower. On the one hand, you will get little benefit from the 2.4GHz wireless network support, which is only available with 2.3GHz Pentium 4 motherboards. On the other, you may have some problems running this mod, even in the best of circumstances. If your graphics card is a fairly recent ATI or Nvidia, it will only work correctly if your video driver supports the latest Direct Rendering Manager (DRM) features. It will also require a supported GPU and
